<b>Web Quarantine<sup>4</sup></b>		√
<b>Email Spooling<sup>5</sup></b>		√
<b>Delegated Admin Per Domain</b>		√
<b>Custom Settings Per Domain</b>		√

<sup>1</sup> Fingerprinting is a learning technology that gains intelligence on spam, based on information collected from all ANS Spam Plus subscribers.

<sup>2</sup> Subject Line Tagging

<sup>3</sup> ANS Spam Plus will notify you when spam email has been quarantined with a link directly to the management tool.

<sup>4</sup> Email is securely quarantined outside of your mail server. Spam mail never comes into your inbox where it can be accidentally triggered causing an infection. The web quarantine holds spam mail for 15 days before auto-disposing.

<sup>5</sup> Email is spooled in ANS Spam Plus servers if you mail server is down so that no mail is lost.
